LOCAL KIDDIES**

SCHOOL REPORT

Wednesday afternoon the Rex theater was filled to capacity with children, guests of the Elks for the annual Christmas party.

The moving picture "Were in the Navy Now" came fully up to expectations and was hilariously received by the youngsters, as was also the two reel comedy and cartoon program. Miss Wilma Palmer played appropriate piano selections in accompaniment to the pictures.

The prize offered for the boy with the most freckles was awarded to Marvin Mosley. Marvin's face hadn't lost any of his freckles at home.

Alberta McMaster captured the prize for the fattest girl, and Lester Franzen for the fattest boy. Both were right there with full sixteen pounds of flesh, and the pounds were there too.

Robert Thorne being the thinnest one entered, was awarded the prize for "Skinny."

The first place in the first race in the relay contest went to Nellie Wallis second.

For the best limerick about the Claresholm Elks, Ralph Wallis won first prize. Horace Davison and George Wallis third. Isobel Dalglish, George Brown, John and Johnny Mullin received the honorable mention. Many of the limericks entered in this competition were original and well deserving of a prize, but the judges, in view of the contestants did not adhere to the subject stated in the competition namely, "The Claresholm Elks," and the judges were forced to disqualify them.

Mr. and Mrs. D. MacGregor Dr. McLean and Mr. L. I. Kain were the judges, and performed their allotted task very acceptably.

Stavely Elk minstrels, with the addition of Claresholm Elk talent, put on an appropriate and skillful performance. In fact the young people appreciated it so greatly that they called for "more" notwithstanding that good things to eat were waiting. Every boy and girl attending, was given a bag of candy and nuts as they passed out at the close of the entertainment.

Following are the prize winning limericks:

Ralph Wallis—
Said Santa Claus once, "Now heath,
Claresholm Elks be an elegant
mob;

They treat lass and laddies

Far more than my job."

Horace Davison—
Hurrah for the gay Elks of

Claresholm.
We never had anything like them
They bring Christmas joys

To small girls and boys,

And Christmas would be dull

without them.

Reggie Wallis—
There was a young man of our

Who thought that to smile was

a pity;

When our Elks he did see

He joined them with glee,

And is now the best man in our

city.

Following are the prize winning limericks:

Isobel Dalglish—
Claresholm is my home, and

naturally I think it is the best

town in Southern Alberta. But

there are facts to justify my

belief.

Its position is good, being close enough to the mountains to receive the rains which do not travel far east. That is in the centre of a wonderful farming district is shown from the fact that land here brings a higher price than anywhere else in Alberta. The grain crop comes from grain reports, a million and a half bushels of wheat alone contributing to the prosperity of the town. Add

To avoid imitation, always look for the signature of *R. H. Fletcher*. Proven directions on each package. Physicians everywhere recommend it.

The Income Tax

In the discussions now proceeding throughout Canada regarding Federal taxation, and in particular the campaign being waged by the Retail Trade Bureau and the Canadian Board of Trade in favor of the abolition of the Income Tax, there is recognition of one outstanding fact. That is, that the present Government has been a large revenue earner to the Dominion. This is the fundamental reason why the Income Tax is now a financial obligation.

But that does not mean that Ottawa has no right to tax.

It is true that a large revenue can be raised in other forms, and that the present value of revenue is required to meet the financial obligations and the current expenditures of the Dominion, except, of course, insofar as current expenditures can be reduced through greater economy and efficiency. Such reductions, cannot, however, be affected immediately, while the public demands that they be implemented.

It would appear axiomatic, however, that if the Income Tax is to be repealed, some other source of revenue to make good the fifty million dollar deficit abated annually through this tax must be tapped. Where, that may be, comes from, and whether it would not simply mean the introduction of new or additional taxes in some other form, advocates of the repeal of the Income Tax, at least, expect to have to make some sacrifice in the field of Government administration. In Government services, in the Civil Service, and in Government expenditures generally, but, as already stated, these cannot be brought about immediately to effect the complete stoppage of Income Tax Revenue.

Advocates of the repeal of the Income Tax do, however, present a strong and logical case as to the ultimate nature and effects of the abolition of Income Tax, and their views are worthy of the most careful and serious consideration.

It is argued that the Income Tax is not only unsound but unjust in that it practically amounts to the imposition of a penalty on the most enterprising, energetic, and productive citizens, who, by their industry and hard labor, have built up the less enterprising and less productive citizens. Such tax, it is argued, discourages men in their best years and impels them to emigrate to the United States where their experience and ability is recognized and rewarded and where only a fraction of their earnings can be taken in taxation as compared with Canada.

It is also argued that, while the Income Tax can be a most effective policy in European countries, such development has resulted in a mature status and where there are vast accumulations of wealth, it is a fatal policy for a young and undeveloped country like Canada, inasmuch as it operates to discourage investment in country and productive enterprises; that instead of encouraging investment and production, Canada's future demands require every encouragement should be given to it, and that such investment develops a larger and permanent population to be secured, and, ultimately, increases revenues to discharge our heavy war indebtedness and provide required funds for our railways and industrial establishments.

Again, say the advocates of repeal, the Income Tax acts as a barrier to the free movement of Capital and of wealth in the United States, Great Britain, Holland, Switzerland, and other countries where more money is invested, and who would thus assist in developing the resources of Canada, but who hesitate to do so in view of the fact that their incomes from such investment are severely taxed.

It must be admitted that these are weighty arguments, and those given in their favor, if Canada is to deal with this taxation problem from the viewpoint of the future as well as the present. And it is to the future we must look to retire our heavy war debt and relieve the burdens of this burden which now hampers our best efforts.

On the other hand, it is urged by those who favor retention of the Income Tax that it is necessary to talk of the tax that can be imposed, inasmuch as it is only possible to pay its property to the ability to do so, as reflected by their annual income. Further, that it is the duty of every man and woman who are not now engaged in any work of production but who are living on invested capital to make up their proper share to the cost of the Government. It was contended during the closing years of the war, and the argument still holds good in numerous instances, that within thousands of miles of here, where miners, farmers, and others engaged in their vocations, they should be required to pay a tax on the income derived from those invested profits.

There coming back to the opening paragraphs of this article, if the Income Tax is retained, then what is the necessary amount that best to oblige the Canadian Government? And, granted that the Income Tax is retained, they regard an Income Tax as a very fair method, but because there is in abeyance the passing of any possibility of further tax reductions, and even fear increases in order to make good the loss of revenue.

Possibly, the only course that will command itself generally to the country, and possibly the only course that will be found in further discussions of the subject, is to retain the Income Tax, and gradually reduce the Income Tax step by step, until it reaches the vanishing point. If the Government deliberately announced a graduated scale of reductions covering a period of years, it would provide the necessary incentive to capital, both at home and abroad, to invest in productive and development enterprises, and encourage the establishment of Canadian industries to remain here to enjoy the rewards before them, and at the same time, it would enable the Government to inaugurate those necessary economies to offset losses in revenue without having recourse to other forms of taxation.

Twenty million tons of iron go to waste annually because of rust, it is estimated.

Coughing.

Take half a tea-spoonful of Minard's Liniment in a moderate量的量 of water. The throat, stops the cough.

According to the Nor-West Farmer a feature of the present year's harvest was the use of "coughing" remedies, and throat and chest rubbers made by several prominent manufacturers in this country. Costing about \$2.00 each they can be operated by two men. One farmer using this apparatus claims to have covered from 4 to 6 acres per hour at a cost of 15 cents per acre. He says that the cost of twelve and nine-tenths of the labor of harvesting.

Complaint of human blood with the blood of the living varieties of life indicates that man and the monkey, like gibbon are closely related.

Plunkett's Next Hit

Revive Comes West After Striking Success in the East

Capt. M. W. Plunkett, producer of the famous "Revive," has had one of the most outstanding successes of his career with a new song and dance hit, "Capt. Plunkett's Revue of 1926." It marks a revolution in venue entertainment. High-class, highly staged, clever, individualistic attraction with much pretty girls as a beauty contest and a superb singing and comedy cast.

The usual chorus girls have been replaced by London's dancing girls, specially made up of specialty girls in comedy, imported direct from London music halls in a charge of a battery of comedians headed by Fred Karno, the English star. In the cast, too, are the international winners of international beauty contests—Miss Toronto and Miss Winnipeg.

The company plays the following engagements in the west:

Theatre, Vancouver; Dec. 4, 5, 6, 7, 8, 9, 10, Empire Theatre, Regina; Dec. 10, 11, Empire Theatre, Saskatoon; Week of Dec. 13th, Empire Theatre, Edmonton; Week of Dec. 13th, Majestic Theatre, Calgary; Dec. 27, 28, Majestic Theatre, Victoria.

SATICIFIC SUFFERING

Comes Because the Nerves Are Tired for Better Blood

There is a new nerve tonic why Dr. William's Pink Pills have proved beneficial in the most severe cases of neuritis, neuralgia, and other complaints. The great secret lies in the action of the nerves. Each of these patients exists because the blood is thin, and the body is not able to supply this literally starving for the nourishment of the blood supply and bone cells act upon the nerves and the resulting pain of the blood in the spinal column of the blood, thus causing disappearance. It is because of this that Dr. William's Pink Pills have been so successful in the treatment of these troubles. As proof, consider the case of Mrs. P. N. Bezanian of Montreal, who, two years ago, I am advised, with a severe case of neuritis and neuralgia in my back and neck, was unable to sleep at night, could not walk, even to move caused me agony, and I had to go to bed. The doctor prescribed Dr. William's Pink Pills for me makes me urge you to get them and similarly add to them."

You can get these pills from your druggist or at 10 cents a box from Dr. William's Medicine Co., Brockville, Ont.

Watched Workmen

Cast Carillon Bells

Premier King, Cast Canadian and English Coin into Metal Metal

While molten metal poured at Crozon fort for the great bells of the church of St. Peter is to be cast in the House of Commons at Ottawa, Premier Mackenzie King cast in a Canadian cast, bearing a date of the Laurier regime, the Canadian Prime Minister was watching the workmen for a moment, as if he were a spectator, and then, after an afternoon, took an English half-penny from his pocket. "Equal status," he said, throwing the English coin to the workmen.

Following the workmen emerged in casting the bells later, Mr. King said one idea of Ottawa's carillon was that it might recall the chimes of Westminster and symbolize the harmony between the two parliaments.

The bell will consist of 52 bells ranging in weight from 4 pounds to 10 tons to 100 tons.

It will Relieve a Cold—Colds are a common ailment and if neglected may lead to serious conditions. Dr. Thomas' Eclectic Ointment relieves sore throat and thoroughly and will strengthen them. It is a most excellent remedy for a sore throat, as it relieves the irritation in the throat. It is painless.

Causing Nausea

Mr. Ulrich McElroy, manager of the Royal Bank in Paris, France, and formerly assistant manager of the Montreal branch, has been appointed to the Legion d'Honor by the French Government according to a French newspaper. Mr. McElroy is a native of New Brunswick. His father, was M.P. for Kent, N.B. He is related to Archibald Henry O'Leary, of Edmonton.

Minard's Liniment for Sore Back.

Simple Colds indicate a need of SCOTT'S EMULSION to build resistance

Notable Ceremony At Imperial Conference

Paul Kruger's Travelling Wagon

Gets Back to South Africa

One of the most interesting events held during the visit of the Dominion Premiers to England for the Imperial Conference was the conference of the freedom of London on Paul Kruger's Travelling Wagon. J. G. Morris, and W. S. Morris, the son of the late Lord Morris, and the subsequent luncheon at which Lord Mayor offered Premier Hertzog the travelling wagon used by Paul Kruger to get to the Imperial Conference in 1908, and which was sold to the British War Office at the time of the First World War, which Lord Kitchener originally presented to Lord Beaconsfield, former Lord Mayor, who afterward presented it to

The South African Prime Minister, in accepting the gift on behalf of the Union, said the art of friendship and good will will be deeply appreciated for its inspiriting influence. The wagon was loaned to the Union by a friend of Britain's victory in the Boer War, and it would, no doubt, be returned to its old home as a proof that Britain had been defeated by friendship.

Referred to the Imperial Conference

Frederick Horatio said:

"Our endeavor has been to build

and not to destroy. I leave London with full satisfaction that our achievement will prove a lasting success and a pleasure to us all severally and jointly."

Favorable Business Outlook

Purchasing Power of Goods Only Purchasing Less Than Last Year

The monthly business summary of the Bank of Montreal says: "During the month uncertainty as to the crop situation in the prairie provinces, caused by adverse weather, has been dispelled, and though many districts have done a disappointing business, the whole picture is not so bad as it was last month, and the crops satisfactory on the whole and represent a purchasing power only slightly less than that of the crops of last year. The purchasing element of last year, however, was not so great in regard to business as has been removed and the outcome is of reasonable assurance."

"The improvement in industry and trade, while it has not yet reached the level of current year, continues, and is perhaps somewhat manifested in railway traffic, while wholesale trade is appreciably better than last year, and retail trade has improved despite the fact that the general purchasing district has been prolonged period of wet weather. Manufacturing operations on the whole are good."

Cuts and Bruises Disappear

When suffering from cuts, bruises, sprains, sunburn, insect bites and any other skin trouble, apply Dr. Thomas' Eclectic Oil. Its healing power is well known. In every accident, Dr. Thomas' Eclectic Oil should be every medicine chest ready for the emergencies that may always be anticipated.

Rhodes Scholarships

New Rhodes House at Oxford to be Completed in 1928

The Rhodes Trust announcement that 18 candidates were examined during October, of which the following month the successful and obtained scholarships were awarded in a radio telegram: First-class commendal, C. S. McLeod, Vancouver; second-class commendal, E. D. Jones Vancouver. The following have been awarded scholarships and have had their training certificates endorsed for additional equipment: Swift Current, Sask.; A. Townsend, Milestone, Sask.

Cuts and Bruises Disappear—When suffering from cuts, bruises, sprains, sunburn, insect bites and any other skin trouble, apply Dr. Thomas' Eclectic Oil. Its healing power is well known. In every accident, Dr. Thomas' Eclectic Oil should be every medicine chest ready for the emergencies that may always be anticipated.

Fatal Accidents in London

Death in London Streets for Quarter Average Three Daily

An average of three deaths daily occurred in the streets of London during the quarter ended September, according to official figures. This compares with two killed daily in the corresponding period last year. The number of deaths in London during the quarter ended September was 298, while those in the same period in 1925 amounted to 257.27.

Buses were responsible for 29 deaths, motorcycles for 2, private cars 76, and trade vehicles 87.

An Imperialist

"I am a Canadian Nationalist, but I am also a British Imperialist," declared Charles D. Roberts, Canadian agent in London, in a speech on Canadian literature and Canadianism at the University of British Columbia, Vancouver. "To be a Canadian Nationalist," he continued, "I believe only in a strong, a powerful, and that is, a British Commonwealth of equal nations."

Money in Timothy Seed

Rodent Control has shown a remarkable increase in the timber industry in Northern Alberta, the growing of Timothy seed. After two years experimenting he engaged in this enterprise on a large scale this year and harvested 39,000 pounds worth eight to eleven cents a pound, netting him a profit of \$16,000.

May Meet Here

Empire Air Conference May Meet in London in 1928

The Canadian Government has invited the Imperial Conference to meet in Canada. The date of the conference has not been determined yet but it is not probable that it will be before the spring of 1928. The refusal of the Imperial Conference countries to use air communications, which has been adopted by the conference, approves the proposed new air route to the Far East and recommends that the conference should receive the attention of the Governments concerned, and that the Dominions and India should examine the possibility of erecting nucleus training bases to raise the morale of the air force.

Royal Canadian Air Force Doing Good Work Checking Smuggling And Locating Many Forest Fires

Atting the fish patrol and helping the customs department to check smuggling at Vancouver; patrolling fires in the valuable forests on the eastern slopes of the Rockies and in Northern Manitoba, where 210 out of 212 fires were located by the RCAF last year, perfecting a Canadian military air force reserve in the huge training place at Camp Borden; modernizing the Royal Canadian Air Force and its equipment by research and research at Ottawa; and mapping the famous Maritime Canadian tourist country at the Dartmouth, N.S., station—these are the main phases of the work of the Royal Canadian Air Force, as set out in a report by Captain J. Stan-Jones, an addition to the Canadian Club at Whistler.

Captain Scott also indicated that the force was developing its own aircraft, having in the works two monoplanes and a three-seater, and a small 60-horsepower motor machine; and that standardization was being effected on a 200-h.p. engine which was to be used in British training camps. The first aircraft in air mail was being considered. In conclusion Captain Scott recommended that Western cities in their planning provide for a central aeronautical station, so that aerofliers would visit Canada in greater and increasing numbers if assured of satisfactory landing and housing for their craft.

Food Value Of Fish

Is the Ideal Food For Marketing, Says Japanese Scientist

Fish is the ideal food for marketing, in the opinion of Chiyomatsu Itoh, who has brought with him to New York 45,000,000 eggs of the Arctic fish, the second best-tasting fish in the world. "The first best-tasting fish in the world," he says, "is the salmon."

"In return I hope to take back to Japan some of the eggs of the Arctic trout," said the scientist.

With two other Japanese scientists, Itoh has come to America to receive the Rockefeller Foundation. They will remain until early in January, visiting the big universities and scientific research centres of this country, studying American methods of research and advancing medical and biological aims.

Exchange Wheat For Coal

Idea for Developing Trade Between Canada and Wales

A scheme for the development of trade between South Wales and Canada by the exchange of wheat for anthracite is to be reported by the Westminster Committee. Sir George Mont's visit to Canada was for the purpose of securing guarantees for this trade and adds that a combination of the unorganized Anthracite Company and the United States Wheat Company was anxious to enter into the scheme going through. The aim is to export anthracite from Swansea to Canada, and import Canadian wheat on return voyages, with the idea of cutting inland trade.

Oats For Seed

Saskatchewan Peat to Supply Survey of Provinces in View of Scarcity

Operator of the Saskatchewan peat are to make a survey throughout the provinces to ascertain the quantity of oats available for seed and food purposes. In view of the reported scarcity of feed oats, it was decided at a session of the peat board of directors.

The general situation with respect to the handling and sale of coarse grain products in the provinces to which a special committee was appointed to report in March was reported to be quite satisfactory by Chas. Pollott, assistant salesman, who handles all coarse grain peat output.

Find Old Cannons

Two ancient canons, said to have been thrown overboard from a Russian ironclad in war when she went aground in 1863, have been discovered in Hailewa Bay near Honolulu. The guns which were discovered lying in 15 feet of water are deeply encrusted with barnacles and other sea growth. The discovery was made by an army officer from Fort Kahekuhele.

Somewhat la la always getting in the way of the man who is in the pursuit of happiness.

Sometimes happens that the man who duels his horse like castle has the most in his eye.

New Method Devised For Freezing Halibut

Brine System Keeps Fish Fresh For Longer Time

A new brine method of freezing halibut will make it possible to market the fish in the eastern markets in equal measure to the fresh fish that has been deiced.

At the recent opening of the new fisheries experimental station at Prince Rupert, a division of the department was given to Dr. G. J. Cowie, director of the station, in the presence of J. J. Cowie, secretary of the Biological Board of Canada.

The demonstration showed the difficulties of freezing halibut under the present system, involving investigations that have been going on for some time. An arctic frozen halibut, it was shown, became dry and tasteless when cut out, and the flesh was in no condition to fresh halibut whereas the flesh when the brine freezing method was employed, could readily be distinguished from fresh fish either in texture or taste.

It is hoped the demonstration proved to place brine frozen halibut, when cut out, on the market as the equal of fresh, while it was impossible to do under the air-freezing system.

Healthful Canned Foods

Greater Care Now Being Taken in Canning Methods to Ensure Safety

In the history of the canned food industry, as regards fruits and vegetables, says Dr. Robert Barne, chief of the Meat and Canned Foods Division of the Bureau of Fisheries, Boston, there has been an extreme care taken in the quality of the finished product as now. Greater care is being exercised in the processing and identification of the canned product in order that the consumer may be assured of the quality claimed.

Regarding canned meats Dr. Barnes in his report to the Veterinary Director General, from which foregoing is quoted, gives an account of the importance of proper canning methods and adds that its continuance will result in the consumer being able to obtain a quality unsurpassed, free from disease, sound and wholesome, the best product the producer can buy, being the government guarantee "Grade Approved."

Regarding canned meats Dr. Barnes in his report to the Veterinary Director General, from which foregoing is quoted, gives an account of the importance of proper canning methods and adds that its continuance will result in the consumer being able to obtain a quality unsurpassed, free from disease, sound and wholesome, the best product the producer can buy, being the government guarantee "Grade Approved."

Dr. Barnes, however, feels compelled to deplore the unwaranted number of cases of food poisoning for slasher and the cardines apparent from the brushes on live stock in handling and shipping.

Many Failures

Soldiers Make Success of Farming in British Columbia

The percentage of failures of returned soldiers who went on the land in British Columbia under the auspices of the Canadian War Service is 27 per cent, according to J. T. Barron, superintendent of the board on live stock in handling and shipping.

That figure is regarded as small enough to indicate that the experiment was made and considered, and when they are compared with the settlement conditions under the 3,000-acre family scheme, out of the 1,650 odd settlers there is a decided advantage in the former. The greatest number of failure came in the first two years of the scheme, and the percentage appears in a more compact and comprehensive immigration policy.

Don't make the mistake of giving a man advice which doesn't conform to his own opinion.

Silence is a virtue that is frequently overlooked by foods.

Saskatchewan Corn Show

Grades of Entries Proved to Be of Excellent Standard

George Worthy, Medlinet Hat farmer, is "Corn King" of the fourth annual Saskatchewan Corn Show at Estevan. His entry of ten ears of Minnesota No. 13 variety won for him the Ogilvie Flour Mills Grand Prize trophy for the best ten ears of corn in show and title of champion.

The corn show was rated remarkable by the various authorities in attendance. All admit that the very unfavorable weather conditions for corn growing led to the best ten ears of corn being inferior to those of last year, but the entry hat turned out to be nearly as large as that of last year, and the grade of entries was an excellent one.

The corn show was rated remarkable by the various authorities in attendance. All admit that the very unfavorable weather conditions for corn growing led to the best ten ears of corn being inferior to those of last year, but the entry hat turned out to be nearly as large as that of last year, and the grade of entries was an excellent one.

The entries of Prairie Nurseries' trophy, best ten ears of white potato, H. H. Maple Creek; Region Board of Trade shield, yellow fine varieties; R. E. Shantz, Shantz's Queen; best ten ears of purple beet, C. A. Unsworth, Playpont; Occidental Fire Insurance Company cup, best ten ears exhibited in Junior class; Currie Hoffman, Maple Creek; G. F. Gimpel, best ten ears of corn exhibited by girl, June Peterson, Weyburn.

Prize essay—L. Elmer Pool, Maple Creek; T. W. Miller, Hecla, Estevan; F. L. Willett, Boleson, Bonanza.

Only three entries were received from the special zone north of the Saskatchewan river—E. P. Trowell, Sceptre, Estevan; W. J. O. Sanderson, North Battleford, two condensates; and Lawrence Laduke, one condensate.

Officers expect in the coming annual meeting of the Saskatchewan Corn Growers, as follows: President, A. J. Colquhoun, Maple Creek; vice-president, A. S. Unsworth, Playpont; second vice-president, A. W. S. Webster, Indian Head; executive director, G. H. Dafford, Winkler; Dr. J. E. Dawson, and P. L. Hyde, M.L.A., all of Maple Creek.

The fifth annual corn show will be held at Maple Creek, where the first show was held four years ago. This was decided by an unanimous vote.

Regarding canned meats Dr. Barnes in his report to the Veterinary Director General, from which foregoing is quoted, gives an account of the importance of proper canning methods and adds that its continuance will result in the consumer being able to obtain a quality unsurpassed, free from disease, sound and wholesome, the best product the producer can buy, being the government guarantee "Grade Approved."

Dr. Barnes, however, feels compelled to deplore the unwaranted number of cases of food poisoning for slasher and the cardines apparent from the brushes on live stock in handling and shipping.

Silence is a virtue that is frequently overlooked by foods.

Increased Immigration

Best Solution of the Greatest Problem

Representatives of the Colonization Board of Central Alberta, affiliation with the Department of Colonization and Development of the Canadian Pacific Railway attended a meeting at Edmonton which was presided over by Col. J. S. Denies, chief commissioner of the Department.

The delegates called upon the express company to assist in favoring increased immigration as a solution to Canada's greatest problem.

Immigration is the only answer to our manpower problem in heavy construction, a man-made problem.

Col. Denies said the following:

"We have been shiped to Canada in a jar of water charged with oxygen, from Florida to Copenhagen, Denmark. The postage was twenty cents."

Police have been shiped to Canada in a jar of water charged with oxygen, from Florida to Copenhagen, Denmark. The postage was twenty cents."

sincerely yours

QUALITY & YOKOM

HOT DOGS And Others

By Blish

Seeing that it is hard form at this time of the year to say anything else we will wish you all a merry Xmas and a happy New Year.

We might throw in some good advices, but nobody will mind if they how, much less appreciate it.

There will probably be a lot of holly and mistletoe around, and many a cheek will stuck be when on the lipsticks.

In that case many will follow Goethe's lead, who "never began a love affair, without instinctively seeing the end and hoping that it might be painless."

Which reminds of what Mr. Kingley asked us this week:

What is the difference between life and love?

According to this authority, life is just one darn thing after the other, but love is two dear things running after each other.

Owaa, oo la la!

Considering all this we ought to view those mistakes struck couples chastily.

Yes we will.

If our information on the supply of both Xmas cheer is correct, we are glad we have only one head.

However remember, that notwithstanding many experiments, glue and seal don't mix.

But "Sweet Adeline" and almost anything else do.

We must admit that Mayor Ringrose is a far-sighted man.

He has proclaimed Monday after Xmas a civic holiday.

It will take some of 'em that long to get back to normalcy again.

And after Xmas has been finished, that's all there is to be celebrated.

The Odd Fellows masquerade ought to be a wow.

Dumb Dumb asked us how she could go and look real funny.

We suggested that she does not mask, but find an organ grinder and sit at the other end of the rope.

One of the Beeches (British boys) wanted to know how he should make up to look like a clown.

Our advice to him is not to make up all.

Mountain Peak Glimpses

Mr. and Mrs. A. Conrad returned to their home at Trout Creek, Ont. after a six months visit in the west.

The Mountain Peak U. F. A. pie social and dance held last Friday was a huge success, saying they had a good time and were ready for more.

Mr. and Mrs. F. Chaine reported to Calgary on Monday. They report the roads in bad shape and had to leave at Okotoks and return by train.

Fred Johnson and S. Chaine are now busy having electric lights installed and are hoping to be able to discard the coal oil lamps by Xmas.

Mrs. Dave Morrison and daughter were in Calgary Xmas shopping last Wednesday.

Mr. and Mrs. Sam Hunter entertained a number of friends at "500" last week. Mrs. J. Dodsberry winning the ladies first prize and Mr. H. Johnson the gents first prize. F. Chaine had no luck that night so took home the booby prize.

Mr. and Mrs. W. Horlacher returned home last Saturday from Spokane.

The Mountain Peak U. F. A. are holding their annual meeting about the second week in January. The order of the evening is a chicken supper.

The Xmas tree held last Tuesday was a big success.

Mountain Peak Union wishes all its members a happy and prosperous New Year.

Nazarene Church Holds Christmas Entertainment

On Wednesday evening last the Church of the Nazarene held their Christmas entertainment. The church was beautifully decorated, and the Christmas tree that graced one corner was splendid with its wealth of tinsel, candle, fruits and nuts.

The following was the program:

Opening song entitled "Joy To The World" by the congregation.

Scripture reading of the Christmas story from Matt. 2nd chapter, verse 1 to 14 inclusive by the pastor, Rev. E. E. Ben.

Recitation "A Large Contract" by Attilio Dahl.

Recitation "One Word From Me" by Marion Peterson.

Recitation "The Best Story" by Jessie Thompson.

Song "Oh, Little Town Of Bethlehem" by Minnie Rudolph.

Recitation "His Christmas in Judes" by Myrtle Smith.

Song "Play Me Ye Faithful" by Dolly Smedstad.

Recitation "Why" by Mary Esther.

Dialogue "The Christian's Witness" by seven children with leader Mrs. N. Thompson.

Song "Christmas Lullaby" by Roanne Bean.

Recitation "Christmas Bells" by Dolly Smedstad.

Recitation "Another Christmas" by W. H. by Mark Dahl.

Recitation "Why Are You Looking At Me" by Marianne Peterson.

Song "Dear Little Stranger" by Clinton and Myrtle Smith.

Recitation "The Christmas Gift" by Roanne Bean.

Recitation "No Room At The Inn" by the pastor Mrs. Olive E. Bean.

Recitation "The Collier's Child" by Violet Mitchell.

Recitation "The Christ Child" by the pastor Mrs. Olive E. Bean.

Recitation "Giving" by Jack DeDahl.

Recitation "The Other Sheep" by Miss Nettie Thompson and the pastor Mrs. Ben.

Recitation "In The Far Sky" by Clinton Smith.

Recitation "Silver Music" by Willis Rudolph.

Diphtheria Is Preventable

"Seymour Plan" Now Put in Operation

All Over America

Hundreds of thousands of young persons of whom among children under ten years of age, could be prevented in Canada each year if parents were completely informed of the fact and took to wise preventive measures.

To this the plan way in which Dr. M. M. Seymour, deputy minister of public health in Saskatchewan, and one of the continent's leading health authorities, sums up the situation: "We have just now started an extensive series of conferences with medical men, government officials and public health bodies in various parts of the United States and Canada. Dr. Seymour is president of the National Board of State and Local Health Authorities.

"In 1932, 1,441 preventable deaths from diphtheria were reported in Canada, excluding Prince Edward Island," he stated. "In the United States, there were 129,461 cases and 16,566 deaths. Both figures are now preventable. One of every eleven cases of diphtheria in Buffalo during the last eleven years, died. The total number of cases was 13,694 and the majority of those who died were under school age. Most of these deaths were preventable."

"No mother wants her child to contract diphtheria and certainly no mother would refuse a simple sample of protection. Yet many mothers have unfortunately, many parents have never been informed. They do not know how easy it is to protect their children or else they hesitate about giving them immunization.

If there are two sentences, are the facts every adult should remember:

"Diphtheria can be prevented by the use of toxoids or toxo-antitoxins; which gives a lasting immunity." "Diphtheria can be cured by the early use of antitoxin."

"No harmful results follow the use of toxoid or toxo-antitoxins. They are one hundred per cent safe. Very young children have no reactions whatever from toxoids."

"The results are surprising. The health departments of 23 representative American cities, some years ago, commenced the general application of toxo-antitoxins to all children under 12 years of age. Diphtheria death rate has fallen an average of 16.2 per cent each year."

"It is something to remember carefully. The heaviest mortality among children from diphtheria is among children under six years of age. It is safe to say that the immunization of one child under six years of age equals the immunization of five school children as far as the death rate is concerned."

"The best time to vaccinate against diphtheria is a month after the third month during the first year. That is the age when children are most in need of the protection."

"Young children," said Dr. Seymour, "can be vaccinated at almost any hour, general reactions whatever. Six months after the vaccination, it is possible, by means of the Schick test to find out definitely whether the person vaccinated has been exposed to diphtheria infection. The Schick test, too, has been a harmful test."

"I receive a great many inquiries about the quality of the virus used for the vaccination. Parents are very anxious to make sure that it is good. I can assure you, a rule, how far they can do so. Let me say again, that the toxoid produced today by the Connaught Laboratories, University of Toronto, is as harmless as it is effective."

Training Farm Larks

According to cabled reports from London the British Government is ready to cooperate in extending the present training scheme for the training of British unplaced farm labor provided that Canada is prepared to bear a proportionate share of the additional expenses. Sir C. H. Ross, Minister of the Department of Immigration, has visited the schools and on a report of his visit is likely to lay a proposal for the extension of the plan.

Papa was deep in a book when his wife called. "Dan boy, has your swallow got the tick. Whatever shall I do?"

"With a pencil," was the reply.

A new wireless device makes it possible to guide ships in thick fog without danger of hitting submerged rocks off the coast. *

Accuracy Is Essential

Few Seconds' Variation in Official Watch Has Caused Many Deaths

Even a slight discrepancy between the watches carried by railroad engineers, conductors and signalmen may cause disastrous loss of life and property. Such errors may have given birth to variation of only a few seconds in official timepieces. It is for this reason that a rigid system of watch inspection and regulation was put into effect on railroads throughout the country, and the Canadian government appointed to superintend this task has under its jurisdiction the employees on 155,000 miles of railroad.

Sometimes an investigation is based on a record. Invariably, however, the most revealing and surprising circumstances condition the account of time. In one region revenue, distinctly different kinds of time were observed in as many towns and villages as there were railroads and freight trains of truck lines. It was discovered, often depended upon clear alarm electric bells in caboose. Also many merchants were giving away cheap time, and a set of clothes after marketandise and engineers and conductors were running their trains by them.

Many clocks in cities and towns seen from trains were found to be unreliable. In some cases the ringing of school bells and the what-of-the-watch was followed by the conductors railroads much.

Books Bound in Jewels

Cory of Knights Bound in Jewels at the Bottom of the Atlantic

At the bottom of the Atlantic lies a jewel-bound copy of Omar Khayyam. It was on its way to America in the ill-fated Titanic, which struck an iceberg and sank in 1912. The book had a similar volume, still in existence, in the museum at Frankfurt, and in its binding twenty-one opals are set.

Another jewel-bound book, which was given to a Comte of a Comte collector, is a copy of "Robin and Juliet." It represents the labor of two men for eight months.

There are four hundred precious stones in a setting of gold and silver and the book is bound in a jeweled leather book about the Jews. The jewels and their gold setting form hearts, doves, and flowers emblematic of love. The red flowers are formed by clusters of rubies.

The book is bound in gold setting form hearts, doves, and flowers emblematic of love. The red flowers are formed by clusters of rubies. The book is bound in gold setting form hearts, doves, and flowers emblematic of love. The red flowers are formed by clusters of rubies.

The Divorce Era

Speculation on Divorce before a Labor Forum.

In London, Dr. Gordon Bates, general secretary of the Canadian Social Hygiene Council, deplored the growth of the divorce era. "In certain large American cities," he said, "we are told that one-half of the married couples have had at least one divorce. In the U.S. the divorce rate is 100 per cent higher than in Canada."

He cited the following statistics: In 1932, the divorce rate in Canada was 1.1 per 1,000 marriages, while in the U.S. it was 1.7 per 1,000.

China Take to Tobacco

Chinaman rapidly emerging out of an ancient civilization and is fast adopting modern ideas and fads. The smoking of cigarettes and cigar is rapidly increasing among men good enough. Chinamen are now fully re-educated and the standard height has been lifted again to six feet.

An Unlikely Garb

The motor car in which Archduke Ferdinand of Austria was slain in Sarajevo, Bosnia, June 28, 1914—the incident that precipitated the World War—seems to be popular in Japan.

Japanese, the automobile apparently and while trying to pass another car, the machine skidded, four or the party being killed.

Must Be Six Feet Tall

The Grenadier Guards whose ranks were filled only with soldiers have gone back to its traditional height requirement, lowered to 5 feet 10 inches in April, 1914, because of the difficulty of getting short men good enough. Grenadiers are now fully re-educated and the standard height has been lifted again to six feet.

A Norwegian Seaman

A Norwegian seaman recently crossed the North Sea alone in an open sailing boat 25 feet long. When he was out two days the boat began to leak, and for eight days the sailor had to bail out the water every three hours.

Beware of the man who never did anything wrong. There's a first time for everything.

Urge Preservation Of Reindeer

May Be Source of Great Wealth for Canada Says Big Game Hunter

The reindeer herds of northern Canada seem to many to be the source of great wealth for the Dominion, according to Captain Henry T. Munro, F.R.G.S., F.Z.S., well known big game hunter and traveller who has been investigating the possibilities of this industry.

Although the Hudson's Bay Company recently gave out a report that experiments with commercial reindeer husbandry were not promising, discrediting Captain Munro is evident that the systematic development will justify itself, and he quotes the success of Denmark and of the Laponian tribes in Europe in utilizing the reindeer on the human side, as follows:

"If we are to save the Eskimo from extinction, we must preserve the reindeer," he said. "If we are to save the reindeer, we must give the Eskimo."

"These are general principles, but complete indifference on the part of the average man when the question of the Canadian Arctic is raised. But I am ready to show that the Arctic practicalities are worth developing. Again from all sentiment, it is a business proposition."

In 1930, around the delta of the Mackenzie River, the Eskimo population was 2,000. Now it is 200. Close contact with the growth of the white race, tuberculosis, epidemics are on the increase.

"Reindeer meat is not a game meat, but domestic. It is fine grained and very much like mutton. A reindeer herd will do well for three years, then the reindeer can be sold and the herd will still be improved."

Health Of Our Live Stock

Less Compensation Now Being Paid for Slaughter of Diseased Animals

Canadian Government

Less compensation is now being paid for the slaughter of diseased animals.

Under the new scheme, farmers and

gardeners giving up to keep our live stock in a healthy condition. This is par-

ticularly true of the most serious menaces to physical efficiency.

A remarkable gathering of doctors, timbermen, lumberjacks, woodsmen and working men, brought together by the Citizens' Council of the Federation of Medical and Allied Services, debated

the problem in London, and decided to set up an industrial clinic to deal

with the scourge of rheumatism.

Rheumatism has lately been revealed as an insidious scourge which costs £2,000,000 a year in sick benefit.

It causes more than 3,000,000 weeks of work to be lost every year, and re-

sults in a large number of deaths.

The object of the meeting was to

discuss the prevention and treatment

of rheumatism in industry.

Dr. J. E. Hopkins, Demobilized Field Husbandman, will be found of particular interest.

Mr. Hopkins emphasizes the

importance of selecting

the right food for animals on farms

where the crop has not been grown before.

A well-drained soil is

the first requirement, because alfalfa

will grow satisfactorily where water stands.

It is important to have a

large amount of lime in the soil.

It is also important to have a

large amount of lime in the soil.

It is also important to have a

large amount of lime in the soil.

It is also important to have a

WORLD HAPPENINGS BRIEFLY TOLD

Directors of the Alberta Wheat Pool decided to accept the offer of the Vancouver Harbor Board to lease the No. 1 warehouse at Vancouver for \$10,000 a month, unanimously demanded withdrawal of the so-called military control commission. Foreign Minister Steenberg declared in the Reichstag:

The Rhodes Scholarship committee of Ontario has awarded the \$1,000 Rhodes scholarship to Tommie D. A. Swinton of Guelph University, who is the winner of this year's scholarships for Ontario.

Walter P. Ince, 45, the past five years secretary of the British Legion, Toronto, and Robert Merchant, Association of Canadians died in hospital at Vancouver after an illness of several weeks.

Cattle exports from Canada to Great Britain continue to decrease. For the month of April, 1927, 12,700 head were exported, bringing the total for the year to 70,171. A year ago 33,200 head were shipped and in 1924, 76,651.

Longest Foodstuff Gurus, new official Soviet agent and trade representative of the British Merchants Association of Canada died in hospital at Vancouver after an illness of several weeks.

Canada's exports to Great Britain continued to decrease. For the month of April, 1927, 12,700 head were exported, bringing the total for the year to 70,171. A year ago 33,200 head were shipped and in 1924, 76,651.

Saskatchewan Government 39-cent 4% per cent debentures to the amount of \$2,000,000 have been sold at 23 per cent, making a total to the province \$435,000. Hon. J. G. Gardner, premier and provincial treasurer, has announced.

Plans of a new Polar expedition by ship on strictly scientific lines were set forth last week. Captain George L. Hart, president of the International Society for the Exploration of the Arctic Regions, at the opening of the International Congress of that body at Berlin.

Herbert Dutton-Foyne, who is slated for the post of under-secretary general of the Canadian government, Dr. Nelles, Nathan, and whose appointment is subject to approval of the Council, is assured of unanimous election at Geneva.

Heavy Wheat Yields

High Yields Reported From Many Parts of Alberta

Farmer reports to the Alberta Department of Agriculture show record wheat yields of wheat, oats, barley, flaxseed, canola, and other crops.

Alex. Godwin of Mayville reported 28 bushels per acre on 180 acres; H. Sorenson of Leduc, had 37 bushels per acre; M. Martin of Stettler, 29 bushels per acre; and H. C. Gruen had 27 bushels on 20 acres. D. W. Gruen, at Lethbridge, averaged 28 bushels on 200 acres; Alfie Galling, at Claresholm, in the Grande Prairie district, had 30 bushels per acre; 29 acres, and many other growers had similar yields.

The average care of Dr. Wm. Whelan, at Gramma, yielded an average of 49 bushels to the acre.

Worked 75 Years For One Firm

And During That Time He Took no Vacations

An unusual record for length of service with one employer was set up recently by William Middleton, father of Mr. James W. E. Middleton, of the Supreme Court of Ontario, who died in Toronto recently in his 95th year. Mr. Middleton had worked for a local lumber company for 75 years. For 10 years up until his retirement six months ago, 75 years, and during all this time he took no vacations, and was kept away from his office only six days through illness. —Canadian As

Is Strictly Temperate

Amos Clark, a resident of Texas, is past 100 years and still going strong and hopes to establish the world's record for longevity. Clark is a survivor of the Mexican War, and says it was in Mexico City that he took his first drink. He has never since touched the bottle and the bitters bottle, according to Clark. His teeth are still in touch with another drink, and hours from his grandparents, to be pretty old people.

However, the average life of most men in your grandparents' generation was probably four or five years, and the average life of those of your parents' generation was fifty years.

Your children should live four years longer than you do. The average life of most men in your parents' generation is to be a little better than the average. Get the habit of the annual health examinations or health audits and you will live longer.

It is important to find out how long you are going to live, to your family doctor and insist that he keep you well.

Many Uses For Paper

Makes Articles Stronger Than Wood and Much Cheaper

Paper for paper have come into more and more importance for various uses. The toll which the house and where they end. He is familiar with paper for reading matter and paper for writing material; with paper for wrapping and paper for starting fires; with paper for covering the walls and even with paper partitions; with paper profits and paper cash.

The experienced housewife tells of paper's labor-saving properties when it comes to covering a chair, to make a garment, to open the lid on the kitchen table before preparing a meal. The window washer will tell you that exemplified paper is as good for peeling paint from windows as any other method, will tell you that a folded newspaper in the front of your car is the best windbreaker you could ask.

Many of the most important usages of paper are unknown as such to the average person. There are many uses, for instance, that we shall always need paper, but not the same. The paper of which they are made is officially called "calendered" or "tissue board." Large circular sheets of it are spread with four parts and a dozen of them are put together and subjected to something like 500 tons pressure until they are reduced to a thickness of less than half an inch. After this, a number of such blocks are pasted together, put under pressure and left to dry for another week. A third combination of these layers is left to dry for another week. Still more layers are added, but each layer is woven, like a net, so that the pieces will not fall apart.

Fire buckets are often paper because their coat is bright red paint, and on paper they are much lighter on the market. The latest coat is made of coated paper rays. They are much lighter than those of wood, are said to be stronger and to cost one-third less.

The Law Of Average

People Count Better It in Long Life

It is a fact in the air today that if you will live longer than others. At least this was the result of an experiment by a class at the University of California June 28 of this year.

The experiment was simply to verify what had been demonstrated by statistics, that is, the law of averages.

Every woman's desire is to achieve that smart, different appearance which makes her attractive to the opposite sex, but she must be careful about publishing her results. The designs illustrated in our new Fashion Book are original and unique, and will help you to acquire that much desired air of individuality. Prices of the book, 10 cents the copy.

Strips of Fabric Are a Favorite Feature of the Season

Boutiques are cleverly placed in very familiar lines in this modish country of striped fabrics, while the back is plain. The collar, long rolling reverses, and vest, are all cut in a simple style, and the belt is the trim cuff on the long daintily striped sleeves. The cravat is bold and gay, and the bodice is fastened with buttons. No. 1446 is for ladies and is size 34. It costs \$14.50 and 14 inches wide. It has 26 hem, requires 10 yards 32-inch striped material; 1/2 yard 36-inch com. lace.

Toads And Gravity

Scientists Staff at Suggestion That They Fall From Sky During Rain

Toads fall from the sky, or so it would seem to the world's eventful legend.

The question has been debated by naturalists following frequent reports that toads fall from the clouds during showers of rain. Not a few authorities laugh at the suggestion that toads fall from the sky, and they deny those who spread the word.

It is to be further pointed out that toads may have water to breed in. During dry weather they bury themselves in the soil, to come out again when the rains come.

It is to be further pointed out that toads may have water to breed in. During dry weather they bury themselves in the soil, to come out again when the rains come.

CHAPTER XX—CONTINUED
She smiled at them both. "I couldn't say that so easily," she explained brightly. "If it wasn't that I'd read, some place, that those three things were particularly wicked—recognition, that is, that you're the ones that we're always lambasting me. John and Mrs. Adams minuscule stood me if I went out and didn't get home until four in the morning. They thought there was something really wrong with me if I didn't get home in time. If I took a swallow out of their flasks the boys distrusted me when I drew a line they mustn't cross, and said I was badning or that I wouldn't take a swallow. And the girls—oh, the girls who didn't have the good time when they were young that I tried to have were envious of me because I happened to be young in those days—but some of them, the old salts, were like all other modern girls. That's why the way you count them up, you know—Misunderstanding, Distrust and Envy. I've always had the thought that my mind, that I haven't had time to grow up, that I could talk about the things I really feel. I've just known boys, and their main line of talk has been, 'Give me a kiss.'

"And—Brandion urged, quickly, in response to that line—"as you may have been?"

Joanna considered a moment. Then she said, as if she were speaking with judicial concern, "It doesn't sound right, does it? But I think you know that today a girl shouldn't be afraid of a kiss, because it's better to give and take them, and know what they amount to, than it is to think about them all the time and then take them too seriously, like girls used to do."

Eggleston was silent. Brandion after

STRATFORD WOMAN

Restored to Health by Lydia E. Pinkham's Vegetable Compound

Stratford, Ontario.—After my first baby was born I started to work on the tenth day and did a big washing for the house. I was still very young (I was married at 19) I did not know what was the matter, so let it go. I was very tired, weak, and nervous, and had a bad headache. For nearly two years I could not sleep at night, and I suffered a great deal of having 'not a head-ache, but a brain-ache'. I began to take Lydia E. Pinkham's Vegetable Compound during the Change of Life and the headache stopped. I began to take two bottles a week to get a little sleep and to feel better and I have never had a headache since. I have had just left, standing molasses, and my eyes litten in silent communion with the girl of yesterday in the gold frame.

CHAPTER XXI.—
The Golden Girl

A wilful beam of mid-morning sun found a crevice between the rose-hill drapes that were intended to keep it from the eyes of a secretary, within their window, and made straight for the face that was almost lost in a mound of pillows—pillows of exquisite lace and silk from golden rooms.

The vagrant beam glided in its discovery, in the shimmer it aroused in good brown hair, in the violet velvet at starting young contours of the face so suddenly mortal in its charm.

Dark lashes fluttered with the sun-ray's provocation and a bare white arm, velvet like the face, crept out from some place underneath the shimmering halo. The slender form outlined under the thin lingerie that was also of a silken lace that may have been priceless, subtle and straightforward, revealing the symmetries that were just curvèd away from boyishness.

A voice that was drawry but not without a twinkle of pediment, asked: "What time is it?"

Out of the musical darkness of the room, which was the bower wherein another voice, clearly that of a patient servant, answered: "It is quite ten o'clock. Mademoiselle. Shall I open the curtains, Mademoiselle?"

Again the soft voice from the depths of the huge, soft bed, "If you please, Mademoiselle."

Martina, very neat and prim in gray morning garb, rose from the edge of the chaise lounge where she had propped herself up for two hours reading, and, with a quiet turn of her head, sat up, and pulled up her curtain repee.

Like a yellow flood the transfiguring Riviera sun burst through the curtained broad windows that curved back in a semi-circle, and all shot off together in a mad circle, the shell pink plushes. Between the exuberant odors of orange, rhubarb and elemite filled the room with the sunshines, which minute fragrances manage to keep in their secret, though screened down below some ineffable perfume of March morning romance.

When Mariana turned from the window, the voice from the bed, not sleepy now but alert, rippling:

"I suppose you will say that I looked so late?" It said in mock severity; "but I suppose you will say that I looked so late?"

Martina, American in head to toe, with a motherly smile, and her dark, ruddy, ruffled, and raffled, seated down on the girl in the big bed, glistening, gleaming bed of golds and plunks and blues mounted on a dais of lace, and a cushion of gold and green plush feathers. There was time enough to hover, for a moment, at the edge of a roulade, but dutifully remembered that, after all, the girl in the bed, whose eyes were twinkling up at her, was still a child.

"When Mariana turned from the window, the voice from the bed, not sleepy now but alert, rippling:

"I suppose you will say that I looked so late?" It said in mock severity; "but I suppose you will say that I looked so late?"

"Mademoiselle did not return from Prince Michael's until three o'clock this morning."

"That's so!" agreed the voice, which had been so carefully comanded. "There was an affair last night, wasn't there?" And something happened, I know something happened, because something always does when Michael feels the urge. And Michael was urged. While you run my bath I will try to remember what about. Maybe it was me. If so, I will tell you about it while I splash."

Eggleston caught her up, sharply. "You?" she replied. "One. But I don't want to talk about him now."

When they had finished their luncheon, Eggleston, a young man, for a short time, in the library again, and it was he who manoeuvred her so that, for a brief moment, she stood close to the fireplace, beneath the warming of the fire.

He had asked nothing of her plans, and there had been only the brief discussion of the business of transforming securities into cash.

"I'm not going to cash them," she said, "but I think a young fool man isn't." Brandion agreed shortly.

They had dinner in a few blocks west, and Eggleston, a young man, put Brandion out of his cabriolet, depositing him on the sidewalk. "I have a terribly secret errand," she explained, "and you must go alone. You won't mind, will you?" He laughed, good humouredly at his disarray, and was glad to see that she was smiling again.

Martha turned off the water tap, just last that the water was fast enough—her mistress never refused to have a cold shower—and went up to the rear window of her car, where she picked up her speaking tube and her car keys to drive away.

"Go back, it's not possible, to Mr. Eggleston—the house we just left."

The afternoon had worn away when Joanna, somewhat very happy smiling in her face, came down Eggleston's library, and, as she passed, the red transparent shade over arm, the satin boudoir mules in her hand. While she knelt at the door to slip the mules on bare feet, and then stood to re-enter the room in form of the old Eggleston regime.

"You haven't made the water too cold, Martha. I tell you what it was that happened last night as soon as I'm in bed. It's cold you shan't know a thing."

When the robe had fallen and the

Treat Colds Externally

For sore throat, bronchitis or chest colds, rub Vicks VapoRub briskly and evenly on the throat, chest and over warm flannel.

Vicks acts in two ways—both direct and indirect. It relieves the cold vapor. A quick relief for the cold ten o'clock. Mademoiselle. Shall I open the curtains, Mademoiselle?"

Again the soft voice from the depths of the huge, soft bed, "If you please, Mademoiselle."

Martina, very neat and prim in gray morning garb, rose from the edge of the chaise lounge where she had propped herself up for two hours reading, and, with a quiet turn of her head, sat up, and pulled up her curtain repee.

They had dinner in a few blocks west, and Eggleston, a young man, put Brandion out of his cabriolet, depositing him on the sidewalk. "I have a terribly secret errand," she explained, "and you must go alone. You won't mind, will you?" He laughed, good humouredly at his disarray, and was glad to see that she was smiling again.

Martha turned off the water tap, just last that the water was fast enough—her mistress never refused to have a cold shower—and went up to the rear window of her car, where she picked up her speaking tube and her car keys to drive away.

"Go back, it's not possible, to Mr. Eggleston—the house we just left."

The afternoon had worn away when Joanna, somewhat very happy smiling in her face, came down Eggleston's library, and, as she passed, the red transparent shade over arm, the satin boudoir mules in her hand. While she knelt at the door to slip the mules on bare feet, and then stood to re-enter the room in form of the old Eggleston regime.

"You haven't made the water too cold, Martha. I tell you what it was that happened last night as soon as I'm in bed. It's cold you shan't know a thing."

Mrs. Pankhurst in England

Returns to Old Country After Spending Seven Years in Canada

After seven years in Canada, working in the interests of social hygiene, Mrs. Pankhurst is back in England.

Her return, however, still finds her friends.

Her friends are trying to induce her to seek a seat in Parliament, and as a matter of fact, Lady Astor offered to let her have her former seat.

An English paper, describing her after her return, said that one could readily pick her out in a fashionable drawing room, not as an "advanced" woman but as a woman most quietly dressed, person and speech.

"Picasso doesn't think me narrow-minded," she says, "I am only old-fashioned enough to find a wide difference between style and good taste."

"Buckley's" for Thrush Health
A clip and morning relieves severe throat trouble. For cases more serious development of the disease is an economic guarantee. Pleasant to take. When you have a sore throat, a single dip足 will bring prompt relief.

Little Helps For This Week

It is more blessed to give than to receive.—Acta xx.

The heart grows rich in giving. All its wealth is living grain, Seeds, soil, water, light, garden, Sun, earth, life, gold with the plain. Is the burden hard and heavy? If you step out, you'll find the path to health by bearing your burden.—God will bear it with and it.

Every good act is charity. Putting a wedge in the right, right is charity. Doing harm to the right, wrong is charity. Smiling in your brother's face is charity.—Malone.

To him who gives but a drop of water to the poor unselfishly, it will be living a life in poverty.

Men are born to help others. To all mothers who have small children, who are old, weak, infirm, or bedridden, a single dip足 will relieve them.

Introducing Modernity in Turkey With a Bang

Imperial tradition again has received a rude blow from modern Turkey.

On Friday the 13th, the new Turkish cabinet, with Dr. Sait, the old premier, will review the 13th anniversary of the new Republic.

One of the most noted features of the new cabinet was the fact that Madam Sandi Bey, invited and to attend the 13th anniversary of the new Republic, regime.

The new cabinet was the result of the 13th anniversary of the new Republic, regime.

One of the first things that a Turk will notice is that the official attire

A variety of garments with a strong male character is a natural bomb. It has a white sportive centre which changes to black powder as the plant matures and, at a certain stage of development, added by heat from the sun, explodes.

Cornelius disappears when treated with Holloway's Corn Remover without leaving a scar.

Grade XIII

Claresholm has an unmeasurable amount of grain, it is difficult to mark a dividing point as to which is the greatest. It would be impossible to give in detail every advantage it possesses. However, a short outline will suffice to let you know what a wonderful town and district we live in.

We are proud to think that Claresholm is the centre of the best wheat producing districts in Canada. All our elevators, sit in number, are filled every year with tons upon tons of grain, and the grain is sent all over the world.

The Agriculture College, which at this time of the year is in full swing, is an outstanding feature. Besides lending trade and beauty to the town, it brings with it so social activities.

In view of its size, Claresholm is very fortunate regarding gas, water and lighting systems. The latter especially is being improved and a new engine has arrived lately, which will add on to our twenty-four hour service.

We must give great praise to our fire brigade, which, although small, does splendid work. While other surrounding towns have had many buildings burn down, the fire department here in Claresholm has quenched more than the great deal of damage, due to the quickness of our fire brigade.

The hospital is another feature not to be overlooked. Great service is being given here and we are proud of it.

We must not forget to include the sports and pastimes. The tennis court is especially worthy of note and provides plenty of exercise during the summer months. Another popular winter sport is the golf course, which is situated conveniently near the town.

The curling and skating rinks afford ample amusement during the winter, and for sportsmen the football and baseball are rich in game and fun. For movie fans there is always the theatre.

Our hotels are very good and give accommodation equal to many of the hotels in the city. The public and high schools are excellent.

It is said to have one of the finest staff of teachers in Alberta and many fine students have been educated here who are now making their way in the world.

Large, but not less, is the business section. Every place of business is fully equipped and all the stores carry large stocks. Two of our garages give night and day service and are second to none in the province.

Sitting up, Claresholm seems to be the ideal place to live and we predict a wonderful future for it.

Elkato, Cont. from Front page
 to this there are the other grains and the thousands of cattle that are shipped from this point. We have the conveniences of water, gas and power and stated that Claresholm is in a better financial position than any other town on the line. It has already grown to a good size and is far enough away from any city to be itself a large community.

A visit to Claresholm in summer shows how great an interest is taken in the "home beautiful," for every garden is bright with flowers and greenery. Our own town is the exception of possessing the only conservatory between Calgary and Macleod.

We have splendid schools, including the Agricultural College, to which the students come from all parts of the Province of Alberta.

With good schools, good churches and various organizations for sports, our young people can see right here at home the training which will make Claresholm of the future a town still

Nellie Wallbeck.

Mr. Miller Sleeps Like Log, Eats Anything

"After taking Adlerika I can eat anything and sleep like a log. I had gas on the stomach and couldn't get food down without it." (Signed) R. C. Miller.

ONE spoonful Adlerika removes GAS and often brings surprising relief to the stomach. Stop full bloated feeling. Gas former oil and water. If you never thought was in your system. Excellent for chronic constipation—Claresholm Pharmacy.
